

## FINE ART PRINTING SERVICE

Ian Hill Fine Art Printing is an inkjet (giclee) digital printing service based in the Macedon Ranges & Central Goldfields region of Victoria, with delivery to all areas of Australia.

Online customers are welcome. I use Express Post delivery Australia wide. Please phone or email me to discuss your project or use the [file upload](#) service to send me your files if you are ready to print.

The printing service operates from my home studio in [Malmsbury](#) and is available by appointment Mon-Fri from 9am-5pm. Please give me a call or send an email to arrange a time to drop in your work or to have a look at the studio and sample prints that demonstrate the range of paper choices available.

## INKJET PAPERS IN STOCK

All of the fine art inkjet papers I use are available at one fixed price to make your choice easier.

If your preferred paper is not in stock, it can be ordered for your printing project the next day. Please feel free to enquire about the papers in stock or to discuss your needs and preferences with me.

### FINE ART

These Canson 310 gsm papers are all rag base papers giving superb image reproduction and the best archival permanence.

**Rag Photo** - silky smooth matte on white base, 100% cotton rag.

**Aquarelle Rag** - strongly textured matte, warmer base tone, 100% rag.

**Printmaking Rag** - lightly textured matte, white base, 100% cotton rag.

**Platine Fibre Rag** - low gloss paper surface similar to traditional black & white fibre base, exceptional sharpness and tonal scale for black & white and colour photographs, 100% cotton rag.

### SMOOTH PEARL

**Iford Galerie Prestige 310gsm** has a durable smooth pearl surface, similar to traditional colour printing paper with good handling properties, on a bright white base.

Prices include GST

## PRINTING PRICES

| PAPER SIZE        | FINE ART    | SMOOTH PEARL |
|-------------------|-------------|--------------|
| A4 (210 x 297mm)  | \$16        | \$12         |
| A3 (297 x 420mm)  | \$32        | \$24         |
| A3+ (329 x 483mm) | \$44        | \$36         |
| A2 (420 x 597mm)  | \$58        | \$48         |
| 610mm (24") roll  | \$120/metre | \$100/metre  |
| 1118mm (44") roll | \$220/metre | \$180/metre  |

Please note: Roll prints are all priced per lineal metre.

**Prices include GST**

## PRINTING MARGINS

A4, A3 & A2 sheets minimum 15mm

610mm roll prints minimum 15mm

1118 roll prints minimum 15mm

These margins provide a safe handling space around your print and give the image 'room to breathe' on the sheet.

## FILE DELIVERY AND SPECIFICATIONS

I prefer TIF or PSD files that are flattened, but full sized.

8 or 16 bit files are fine. It's easiest to leave them in their current bit depth.

Hard drive, USB stick and discs are all fine for in-person delivery.

Online customers please use the [file upload](#) service, making sure to supply your phone number so we can discuss your needs.

## PAYMENT OPTIONS

Payment on all jobs is via bank transfer using the account details on the tax invoice.

## TURN-AROUND TIMES

Your prints will be ready for collection or sent via Express Post within 2-3 days of ordering.

Special request urgent jobs can usually be accommodated, please let me know your needs.

**Prices include GST**

## FILM DIGITIZING FOR PRINT

### **Film is not dead; it just needs to be digitized!**

I offer a film digitizing service that creates high resolution, print ready 300dpi files from film of all types and formats up to 10x8".

The files I create are colour corrected and spotted 16-bit Adobe RGB files that are ready to print.

The technique I employ is an alternative to scanning, using a camera and macro lens to photograph your negatives on a light-box. Multi-shot stitching is used to increase file size to 300 dpi for large print sizes.

This method gives finely detailed, sharp results and is colour managed to give the best quality reproductions from your originals.

Service time is 2-3 days.

If you have artwork that needs to be digitized, please refer to my [Artwork Documentation](#) service for more information.

| PRINT SIZE @ 300 DPI | FILE SIZE (approx.) | 1 ORIGINAL | 2-5  | >5   |
|----------------------|---------------------|------------|------|------|
| up to A2             | 200mB               | \$40       | \$30 | \$20 |
| A1                   | 400mB               | \$60       | \$40 | \$30 |
| A0                   | 900mB               | \$80       | \$60 | \$40 |

**Prices include GST**

## POSTAGE AND PACKAGING

All online orders are sent using Express Post for next day delivery and postal tracking.

I use rigid cardboard mailers with additional stiffeners for all sheet sizes including A2, so your prints arrive safely and remain perfectly flat.

Roll prints are wrapped in acid free tissue and sealed in polyethylene bags.

I use extra-large 125mm cardboard mailing tubes to minimize curling of roll prints.

### EXPRESS POST PRICES

| PRINT SIZE  | MELBOURNE & VICTORIA | OTHER STATES |
|-------------|----------------------|--------------|
| A4, A3      | \$16.50              | \$16.50      |
| A2          | \$22                 | \$27.50      |
| 610mm roll  | \$22                 | \$27.50      |
| 1118mm roll | \$27.50              | \$33         |

## EXHIBITION RATES AND STUDENT DISCOUNTS

I believe in supporting current and future arts practitioners getting their work made.

Artists wishing to print a body of work for exhibition and currently enrolled secondary and tertiary students will receive 10% off all print prices. Please supply a scan or copy of your student card for verification.

## TERMS AND CONDITIONS

I assume that you are the copyright holder of all film, artwork or digital files supplied to me for copying or printing.

Any claim of damage to your prints is limited to that resulting from the Express Post service.

I will happily reprint or reimburse you for damages caused this way, but cannot be liable for any other form of physical damage to a print that has occurred after it leaves my studio.

Please advise immediately if you have any damage caused through the postal service.
